22	23	24	25	26	27	28
29	30	31	RE-ORDER CRICKET LOAM			

TOP TIPS

- ✓ Consider the use of pre-germinated seeds on pitch ends with one of our Cricket Seed products
- ✓ To aid seed establishment use fine grass clippings to create a fine mulch
- ✓ Make sure you are using new seed!

MENDIP CRICKET LOAM

- Provides a manageable clay content of approximate 26-28% screened to 3mm
- Provides the perfect hard-wearing surface

EXPERT ADVICE

As the between match work begins you'll be repairing the wicket ends using your chosen loam such as Mendip cricket loam, Binders Super Surrey Loam or Kaloam.

CREATE A FINE MULCH

To aid seed establishment use fine grass clippings to create a fine mulch

You'll also be wanting to make sure it is worked into the surface using a sorrel roller rather than simply being placed on top of the existing surface.

BIOACTIVE SEAWEED

- Promotes strong root development
- Improves plants tolerance to environmental and biological stresses
- Encourages activity of beneficial microbes

We recommend Bio active Seaweed to assist with root development.
