BOOK RENOVATION WITH PHIL DAY SPORTS

TOP TIPS

- ✓ Keep your irrigation programme running even if there is heavy rain as this tends to run off the square and not penetrate the soil.
- ✓ Pay attention to foot holes as the end of the season approaches with player safety in mind.
- ✓ Make sure to plan all of your consumables and get your orders in to Phil Day Sports

EXPERT ADVICE

As the season draws to a close keep an eye out for fungal disease – especially where covers have been used. We recommend using Banner Maxx.

Continuing to remove dew from the turf surface as this will help reduce disease attacks.

Light aeration will keep the soil oxygen levels balanced in the event of any humidity.

BANNER MAXX

Banner Maxx is a broad spectrum foliar fungicide with systemic properties for control of Dollar Spot, Fusarium Patch, Anthracnose and Brown Patch on managed amenity turf and amenity grassland.

FERTILISER APPLICATION

August is a good time for an organic fertiliser application, taking you through to the October Autumn / Winter feed. We recommend Verdiculture Organic 6-2-4

LOOKING AHEAD

Give us a ring at PhilDay Sports to discuss what post-season renovation is right for your needs.
