ORDER WETTING AGENTS FOR JULY

TOP TIPS

- ✓ Weeds will be at their most prominent now – spray with a selected weed killer to control any infestations
- ✓ Water at night where possible to prevent shallow rooting
- ✓ Consider raising the cut to maintain additional grass cover if you are concerned about drying out

EXPERT ADVICE

Capitalise on the longer daylight hours and improved seed germination conditions by making sure the grass seed can establish in a loose surface with sufficient moisture.

Use a seed mixture with cultivars that have been selected for their low crown such as: PDS Special Cricket Mix Growmax Treated, Pro Master 35 Universal Cricket Squares, Tees & Tennis Courts or Johnsons J Premier Wicket.

CHEMICAL APPLICATION

Remember when using weed killers to control infestations to check you have the relevant qualifications for the application of chemicals.

REGENERATION RESULTS

Use a liquid fertiliser designed to regenerate a post match wicket such as ICL Sportsmaster 10-0-10

SPRAYING APPLICATIONS

At PDS, we supply chemical treatments, from fertilisers & weed killers to pest control & growth regulators.

All spraying is carried out by fully certificated operators.
