RE-ORDER BIOACTIVE SEAWEED

TOP TIPS

- ✓ Make sure when irrigating that your water penetrates into the rootzone to a minimum of 100mm to prevent dry patch- we recommend Angus Aqua Easy
- ✓ Remember that rolling should start and finish in line with the direction of play
- ✓ Keep a record of moisture content, soil temperature, soil pH and nutrient status where possible

REPEAT SCARIFICATION

Look to scarify again to reduce thatch and remember to adjust the weight of the roller depending on the weather.

USING BIOACTIVE SEAWEED

- Results in stronger & healthier plants
- Concentrated natural formulation
- Low application rates for greater affordability

FUNGICIDE FACT

When it comes to fungicides, mixing two or more products in the same tank can help reduce disease resistance – we can advise, mix and apply

EXPERT ADVICE

If you are looking for further nutrition in late spring consider Bioactive Seaweed which can be applied using a knapsack sprayer.

As soils warm up, keep an eye out for pest activity including Leather Jackets and Chafers.

We recommend Nemasys J & G. Alternatively, contact us for specific advice regarding pest control products.
