TOP TIPS

- ✔ Keep a back up of Heritage Maxx to treat Red Thread and Fusarium.
- ✔ Be proactive with your pest control – treat Leatherjackets and chafer grubs while they are young with Nemasys J & G before the larvae rise to the surface in the spring.
- ✔ If the weather is warm turf weeds will still be growing – take this final opportunity to control weeds going into the winter such as Praxys.

EXPERT ADVICE

ANGUS DOWNCAST

- Non-pesticidal: improves turf health
- Encourages casting worms away from sward surface
- No growth flushes
- Easily applied

HERITAGE MAXX

- High performance fungicide
- Faster uptake
- Longer lasting disease control
- Improved turf quality

AERATION OPTIONS

We use a variety of equipment to suit clients needs, including: 2.2

Shockwave De-compactor, 3 x Verti-drain machines and Verti-core 1700.

Call us today for aeration advice.

Continue to aerate to help the young seedlings establish.

Around this time of year the risk of disease increases – particularly Fusarium, Fairy Rings and Anthracnose. If you notice any of these we can treat with our range of Fungicides.

For expert advice on which fungicides to choose, call us on 01386 462 425.
